NEOGEN Cu

Fertilizer containing copper

COMPOSITION

Copper (Cu)..... 3 %

FORMULATION TYPE

Soluble Liquid

HAZARD IDENTIFICATION

PACKAGING

0,25-0,5, 1 l bottle
3, 5, 10, 20 l tank

CHARACTERISTICS:

NEOGEN Cu is a latest-generation product characterized by a particular nanosystemic formulation containing copper sulphate pentahydrate in ionic form that allows its use at low dosage.

The product has been specifically designed to prevent and treat micro-deficiency of copper.

NEOGEN Cu shortly after distribution quickly penetrates the leaf and root tissues thus avoiding the risk of leaching. **NEOGEN Cu** shows a high systemic activity and rapid assimilation through leaves, branches and roots.

DOSE OF USE:

NEOGEN Cu is used at a dose of 1,5-2 lt/ha on all type of crops. Perform 2-3 treatments during various crop stages depending on crop needs.

COMPATIBILITY:

NEOGEN Cu can be mixed with most products except those with an alkaline reaction (polysulfides, phosphates, mineral oils) and amino acids. In case of mixing with other products, it is advisable to do preliminary tests.
