Technical data sheet

SILVAN[®]

EC FERTILIZER - FERTILISER SOLUTION NP 6-15

COMPOSITION

NITROGEN (N) TOTAL...
6,0%
NITROGEN (N) AMM..... 6%
Water soluble PHOSPHO-
RUS PENTOXIDE
(P2O5).....15%

FORMULATION TYPE

Soluble liquid

HAZARD IDENTIFICATION

PACKAGING

12x1 liter bottle in carton
box
5 liters can in 4x5 carton
box

DOSAGE AND DIRECTIONS FOR USE: **SILVAN** is a fertiliser containing Nitrogen, Phosphorus in the form of Phosphite ions and silver as an additive, that is totally assimilable by all vegetable, fruit, flower and industrial crops.

SILVAN helps prevent and cure Nitrogen and Phosphorous deficiencies within the plant.

The effectiveness of the product is improved by the silver contained in it significantly increases photosynthetic activity.

SILVAN is rapidly absorbed by all plant organs and is transported inside.

SILVAN is used on all crops in a dosage of 2.5-3 kg/ha (250-300 g/hl)

The best results are obtained by repeating treatment 3-4 times depending on need.

COMPATIBILITY: **SILVAN** is compatible with all commonly used preparations. Do not mix with Oils or strongly alkaline reaction products.

CAUTION: Treat in the cooler hours of the day, evenly wetting the vegetation.
